

RECORDED (00700-226)

The Cuban Volunteers from the South of America have been organized with the following aims and concentrated special training prior to their arrival. This special training will be to prepare all personnel for an early and effective mission that is based on a broad, realistic plan that incorporates the political, administrative, and military phases of land and air operations. This will be intended in order to initiate the primary phase of operations. During this time, disregarding the present status of our military forces, the unit will conduct guerrilla operations. The assigned mission for the unit once trained and battle tested will be to serve as a mobile reception committee for the channeling of supplies and equipment to the better guerrilla bands and resistance groups operating within the unit's area of operation. It is imperative that all airdrops and landings be under the control and supervision of specially trained personnel that have been installed especially for this duty. This is due to the time that is required to move sufficient personnel committee personnel to a hostile area having only limited time available.

In a more advanced phase, the unit will be able to move independently following the completion and communication specialists due to the fact that after serving as a mobile reception committee, the unit will be able to move independently as guerrilla elements as their only contact with the mobile reception committee staff making a minimum effort to bring along the personnel required for this purpose. As far as possible, it is probable that the unit will be located in the city of Havana, Cuba according to present, it is probable at least that Havana, Cuba will become the headquarters element that directs all actions and operations throughout for the entire force.

Included in the mobile unit's mission is the protection of supply lines so as to have no access to the ready received elements that will be operated prior to arrival in an efficient and effective operating status. The unit will be in a position

APPROVED FOR RELEASE

**INTRODUCTION (CONT'D)**

**INTRO**

state of readiness to never contact with our guerrilla unit so that it may serve as a propaganda committee for another more efficient unit.

Inability after being infiltrated into China, the unit will proceed to conduct numerous reconnaissance patrols of the area in which it plans to conduct future operations.

Among the numerous objectives of the reconnaissance patrols is intelligence relating to:

- (1) Many details of operation
- (2) Attitudes of local inhabitants
- (3) Identification of the terrain
- (4) Current political situation
- (5) Current economic conditions
- (6) Biographical sketches of enemy leaders
- (7) Enemy capabilities
- (8) Presence of friendly guerrilla forces and resistance movements
- (9) Health and sanitation data
- (10) Natural geographical boundaries
- (11) Routines of organizations

Once the unit has performed a working operation map of its area, it will proceed to gather, prepare, and transmit intelligence to the agency command.

The unit will continue conducting no many reconnaissance patrols as security allows or until all personnel are one, likely familiar with the units area of operations. If possible, all available local radio sites will be plotted and an aircrew or codice will be created prior to contacting local resistance elements. This is to allow the unit to storeable records supplies that can't be brought in when initially infiltrated. Then, if contact with resistance elements occurs in foreign, the unit will have sufficient material if forced to operate as a personal guerrilla column. The duties of the unit will depend on a mobile reception condition are numerous. Primary is the evaluation of the guerrilla unit to gather, delineate its potential, operational effectiveness, ability to use the supplies reported, and locate their knowing the mounting factors concerning collection of contacts.

The personnel involved in this operation are native to the area in which they

*F82-0428/1*

**EXERCISE (GENERAL) DETAILS**

are to operate. The primary factors being considered concerning this mission are:

- (1) Transportation and security of the unit while infiltrating Cuba.
- (2) The support of this unit once inside Cuba, and the tactical support once they are engaged in decisive operations.

Attached are the following:

- (1) Detailed list of the material that will be used to sustain the unit in operational status.
- (2) Detailed description of the training site.
- (3) Description of the zone in which the unit will operate.
- (4) List of the personnel involved in the operation.

**TRAINING SITE**

The personnel selected for specialized training will be transported by vehicle or airway to the AFSC FAIR AIR FORCE BASE 2000, Anna Park, Florida. This area is located approximately 100 six miles North Northwest of the city of Miami, Florida.

Through the entire area is excellent a hunting range and under U.S. Government control, only the South Southeast corner of the reservation is used as such. The personnel involved will, of course, be restricted from entering the larger area.

As this is U.S. Government property, civilian personnel do not frequent the area. U.S. Air Force personnel rarely tour the waters not included in the hunting range beyond area of the S.E.C. corner of the site. They are restricted from entering most the other areas due to the fact of one a single facility. The area is completely inaccessible by water & air.

This area is considered suitable and highly desirable due to the following:  
- good hunting.

- (1) Good hunting and fishing opportunities.
- (2) Close proximity to the Island of Cuba.
- (3) Good communications (air and sea) to and from Cuba.

F82-0428/1

**MEMORANDUM (CONTINUED) *CONFIDENTIAL***

- (6) Close proximity of airports.  
(7) The area is under control of the U.S. Government, thus anyone observing our personnel in training will assume that they are U.S. Air Force elements undergoing survival training.

Due to the character of this mission, the training will not be open to civilian observation and it's existence must be maintained SECRET from all other organizations. To insure security, all personnel will be strictly prohibited from exiting the training area.

Respectfully submitted,

Carlos Rodriguez Vega

**EXHIBIT D (CONTINUED) List of Equipment**

The Collection is a list intended to cover the main items found and known to be required necessary to the operations of a commando party (one man is to be maintained over a period of time). This list also contains the items required for the making and carrying of flares and to a high degree of detail.

**1. FIELD EQUIPMENT**

- 10 pr. Trousers (camouflage, herringbone twill)
- 10 pr. Jackets (camouflage, herringbone twill)
- 10 pr. Trouser (Fatigue, herringbone twill)
- 10 pr. Jackets (Fatigue, herringbone twill)
- 60 pr. Boots, combat (Cervus)
- 10 pr. Helmets, combat trooper
- 10 pr. Gloves, brown, CMC type
- 20 pr. Gloves, leather, auto, brown
- 100 pr. T shirts, color green or C.R.
- 10 pr. Helmets, basic or campaign type
- 10 pr. Jackets, Field, 3 LL type
- 10 pr. Personal kit bag, rucksack, tent, brush, poncho, etc.
- 10 pr. Shirts, color green or C.R. (dormant)

**2. FIELD EQUIPMENT, CONT.**

- 10 pr. Ponchos, lightweight, C.R., with hood
- 10 pr. Foul, combat
- 10 pr. Ponch, cargo
- 10 pr. Ponch, combat
- 10 pr. Ponch, combat
- 10 pr. Ponches, cargo
- 10 pr. Ponches, cargo, and covers (U.S. issued)
- 10 pr. Ponch, first aid, w/ cover
- 10 pr. Ponches, large, combat, first aid
- 10 pr. Ponch, general w/ cover
- 10 pr. Ponches, sleeping, first aid
- 10 pr. Kit, medical, field, first aid
- 10 pr. Ponches, mess kit
- 10 pr. Ponches, grenade, 3 prong type
- 10 pr. Ponches, pistol rapid load
- 10 pr. Pkt, cartridge, M1
- 11 pr. Belt, pistol
- 11 pr. Bolt, magazine, automatic rifle, Browning type
- 10 pr. Gove's, folding, antitank, w/ cover
- 10 pr. Pkt, cartridge, submachine gun
- 10 pr. Pkt, cartridge, w/ case (Gallim)
- 10 pr. Pkt, cartridge, U.S. type, w/ case, 1000
- 4 pr. Grenades, 1 pound, U.S. issue, w/ cover
- 10 pr. Ponches, antitank, British type, 10 prong

EXHIBIT (CONTINUED) List of Material Page 2

**ARMED WEAPONS, KNIVES (continued)**

- 50 ea Pens, magnetic, retractile pistol, .45 cal.
- 20 ea Knives, folding, U.S. issue
- 100 ea Knives, pocket, camouflage, individual
- 40 ea Knives, bayonet, 12" w/ case
- 60 ea Knives, folding (camouflage) w/ case
- 60 ea Military pistol, .45 cal. & handle, leather
- 200 ft Kite, parabolic suspension, nylon, 0.5m

**OCULARS AND ETC.**

- 20 ea Binoculars
- 8 ea Rpt, 3 million, coding
- 4 ea Opt., vision, 5 billion
- 15 ea Opt., 100,000 scale, military, Inert of 0.5m
- 15 ea Opt., 100,000 scale, military, readers of each profane, Inert of 0.5m
- 15 ea Goggles w/ mag, 0.5m
- 2 ea Opt., binocular, retractile, field, 3 sec trans/retactile, complete
- 120 em Lens, field, 2000, large leaf type
- 2 ea Lenses, refractor, central, 6 mm type, rollers, complete
- 27 em Patches, lenscraft, camouflage
- 100 ci Lens, refraction, field, flat end 0.4 type, 12 leaves per case
- 50 ci Tapes, film, celluloid, coated paper type
- 500 ft Ropes, 2.5cm, 1 inch diam
- 3 ea Tape, cellul, w/ milis, 20 m of each
- 40 ci Gaskets, 1.5cm, H, (Camouflage type)
- 1 ea Tools, screw, air infiltrate, (camouflaged)
- 12 em Heddle, wood (spool type)
- 6 em Harness, steel w/ wood handle, hand
- 1 ea Lamp, hand, w/ wood handle
- 200 ft Lines, suspension, synthetic, 0.5m, color
- 10 em Cans, paint, 0.5m color, 1 can w/ case
- 1 ea Blackboard, 4 ft x 6 ft
- 82 m Grill, wire, in 3 inch pieces
- 100 em Grill, warped satire, in 3 foot pieces
- 1 ea Pergo, floor, particle type
- 1 em Kegs, steel, 250 lb. type
- 1 ea Box, tools, true writing, complete
- 100 pc Bottling, for 1000, camouflage type (square glass)
- 100 em Cricket, box, signal type
- 22 em Knives, brass, police type
- 3 em Flashlight, pl. steel, 2 cell, belt type, 10.5" long, 0.5m
- 60 pc Boxes, leather, Army type, thick or thin, cases
- 40 pc Sunglasses, plastic, military type
- 40 pc Rg., plastic, personal effects, on 11
- 40 pc Kite, anti kite, military type, w/ surface, w/ case
